

Prompt 5

KKC TEXT ADVENTURE — PROMPT 5 OF 180

=====

Imre and the Eolian: Crossing the River, Music, and Talent Pipes

=====

This prompt builds directly on Prompts 1, 2, 3, and 4.

Do not restructure, rename, or refactor anything from those prompts.

Only add to what exists.

HARD BANS — UNCHANGED

No external APIs. No HTTP clients. No LLM. No Anthropic, OpenAI, or any remote service. No web server. No frontend. Fully offline only.

No new abstractions unless explicitly required here.

No new files unless listed in this prompt.

Do not refactor working code from earlier prompts.

CANON RESTRAINT RULE — READ FIRST

Imre and the Eolian are canon-grounded, but do not over-invent them.

What is safe to model here:

- the walk from the University side to Imre takes meaningful time
- Stonebridge / the river crossing is a real transition point
- the Eolian has an exterior approach, a music room / floor, and the social sense of a place where reputation matters
- the Eolian awards talent pipes to musicians judged worthy
- Deoch and Stanchion are canon figures associated with the Eolian

Do NOT:

- invent exact architecture with confidence
- add Denna as an always-available NPC in this prompt
- add Devi in this prompt
- script major canon scenes from the books
- make the Eolian a generic tavern for tips
- make earning talent pipes feel easy, casual, or gamey
- turn the Eolian into a combat, stealth, or drama hub

Keep the tone social, musical, and reputational.

GOAL OF THIS PROMPT

By the end of Prompt 5, the player should be able to:

- Walk from the University side to Imre through a coherent chain of locations
- Reach the Eolian exterior and enter only when it is open
- Talk to Deoch and Stanchion in voices that feel right
- Ask about the pipes and understand that they are earned, not bought
- Attempt an audition for talent pipes
- Either fail cleanly or succeed and gain the pipes
- If they have earned their pipes, play at the Eolian for prestige and reputation rather than tavern-style coin
- Feel that Imre is distinct from the University: looser, brighter, and more public, but still socially dangerous

SCOPE OF THIS PROMPT

This prompt covers:

1. Expand the map from the University to Imre
2. Add the Eolian exterior and interior
3. Add Deoch and Stanchion as NPCs
4. Add EolianState to PlayerState
5. Add musicEngine.ts for audition and performance logic
6. Add commands:
 - audition for pipes
 - play at eolian
7. Extend npcEngine.ts so the player can ask about the pipes, music, and the Eolian
8. Add deterministic music outcome text
9. Add tests for Eolian entry, audition, and post-pipes performance

This prompt does NOT cover:

- Denna as a system-heavy recurring NPC
- Devi or moneylending
- the Maer, Vintas, or later travel
- Ambrose sabotage in Imre
- named songs from the books as verbatim text
- advanced performance simulation
- academic rank advancement (Prompt 6)
- sygaldry (Prompt 7)

NEW FILES IN THIS PROMPT

Add exactly these files:

```
src/  
  engine/  
    musicEngine.ts      ← audition + Eolian performance logic  
  content/  
    eolianDialogue.ts   ← authored dialogue / result pools  
tests/  
  musicEngine.test.ts
```

Modify these existing files:

```
src/types/index.ts  
src/engine/state.ts  
src/engine/actions.ts  
src/engine/movement.ts  
src/engine/time.ts  
src/engine/npcEngine.ts  
src/content/npcProfiles.ts  
src/content/locationFlavour.ts  
src/db/seed.ts
```

Do not add any other files.

TYPES — additions to src/types/index.ts

Add these interfaces. Do not remove or change existing ones.

```
export interface EolianState {  
  has_talent_pipes: boolean;  
  last_audition_day: number | null;  
  performances_today: number;  
}
```

Also add to PlayerState:

```
eolian_state: EolianState;
```

Update initDefaultPlayerState() in engine/state.ts to include:

```
eolian_state: {  
  has_talent_pipes: false,  
  last_audition_day: null,  
  performances_today: 0,  
}
```

Do not add any other new player-state systems in this prompt.

SEED EXPANSION — src/db/seed.ts

Expand runSeed(db) to insert 5 new locations (INSERT OR IGNORE).
Keep all existing locations unchanged unless explicitly updated here.

Add these 5 locations:

university_riverside_road

name: "the riverside road"

exits:

east -> university_ankers

west -> stonebridge

tier: 2, cluster_id: 'university', era: 'university'

Note: This is the road/walkway leading toward the bridge.

Keep the description generic and modest.

stonebridge

name: "Stonebridge"

exits:

east -> university_riverside_road

west -> imre_fountain_square

tier: 1, cluster_id: 'river_crossing', era: 'university'

Note: It is the crossing between the University side and Imre.

Do not invent ornate structural details.

imre_fountain_square

name: "the square before the Eolian"

exits:

east -> stonebridge

west -> eolian_exterior

tier: 1, cluster_id: 'imre', era: 'university'

Note: This is the open area outside the Eolian, with fountain presence and public traffic. Keep it vivid but restrained.

eolian_exterior

name: "outside the Eolian"

exits:

east -> imre_fountain_square

enter -> eolian_floor

(access_condition: 'open_evening')

tier: 1, cluster_id: 'imre', era: 'university'

Note: Entrance to the venue. Do not over-describe its facade.

eolian_floor

name: "the Eolian"

exits:

out -> eolian_exterior

tier: 1, cluster_id: 'imre', era: 'university'

Note: Music venue, conversation, listening, stage presence.

Keep the description atmospheric and public-facing.

Update one existing exit:

university_ankers

add:

west -> university_riverside_road

Do not remove any existing valid exits.

Also insert 2 NPCs:

deoch

name: "Deoch"

location_id: eolian_floor

era: university

temperament: "social, observant, seasoned, careful without seeming stiff"

speech_style: "easy, polished, attentive, capable of warmth but not foolish"

stanchion

name: "Stanchion"

location_id: eolian_floor

era: university

temperament: "practical, fair-minded, busy, good judge of performance"

speech_style: "plainspoken, steady, hospitable but brisk when working"

Do not add Denna or Devi in this prompt.

NPC PROFILES — update src/content/npcProfiles.ts

Extend NPC_PROFILES with: deoch, stanchion

Rules for all authored text:

- Original prose only
- Do NOT reproduce Rothfuss lines
- Keep each line concise and playable
- greeting_pool: exactly 3 entries
- exit_lines: exactly 2 entries

Deoch profile:

id: 'deoch'

name: 'Deoch'

era: 'university'

home_location_id: 'eolian_floor'

temperament: 'social, observant, seasoned, careful without seeming stiff'

speech_style: 'easy and polished, hospitable, notices moods, not easily rattled'

known_topics:

- music
- players
- the eolian
- imre
- pipes

taboo_topics:

- private patron business
- gossip presented as fact
- being pressed for secrets

greeting_pool:

exactly 3 brief greetings that feel socially smooth and professional

exit_lines:

exactly 2 lines that politely end a conversation

Stanchion profile:

id: 'stanchion'

name: 'Stanchion'

era: 'university'

home_location_id: 'eolian_floor'

temperament: 'practical, fair-minded, busy, good judge of performance'

speech_style: 'plainspoken, steady, clear, judges music without ornament'

known_topics:

- pipes
- auditions
- performers
- rules
- the eolian

taboo_topics:

- flattery
- shortcuts
- entitlement

greeting_pool:

exactly 3 brief greetings that feel brisk but fair

exit_lines:

exactly 2 brief ways to dismiss a conversation and return to work

Do not flatten either NPC into a generic innkeeper.

AUTHORED DIALOGUE — src/content/eolianDialogue.ts

Export these constants:

```
EOLIAN_AUDITION_BLOCKED: string[]
EOLIAN_AUDITION_FAIL: string[]
EOLIAN_AUDITION_SUCCESS: string[]
EOLIAN_PLAY_LINES: string[]
EOLIAN_NOT_OPEN_LINES: string[]
```

Rules:

- Original prose only
- Maximum 2 sentences per entry
- Exactly 3 entries in each pool
- Deterministic selection only:
 $\text{index} = \text{state.day_number} \% 3$
- The Eolian should feel socially charged, not generic
- Success should feel significant but not over-written
- Failure should feel public and memorable without melodrama
- “Not open” should feel like a venue schedule, not a hard game wall

Tone guidance:

Audition blocked:

Use when wrong location, wrong time, no lute, already attempted today, or already has pipes.

Audition fail:

The player is good enough to be taken seriously, but not accepted this time.

Audition success:

This is a real threshold moment. Keep it brief, concrete, and earned.

Play lines:

These are for a musician who already has talent pipes.
No direct tips or coin here — this is prestige, not tavern busking.

ENGINE — src/engine/musicEngine.ts

This file owns all Eolian truth for this prompt.
It does not narrate via narrator methods.

It may return authored lines from eolianDialogue.ts.

Implement and export:

canEnterEolian(state: PlayerState): boolean

Return true only if:

state.time_of_day is 'evening' or 'night'

Otherwise false.

calculateAuditionScore(state: PlayerState): number

Return a deterministic score 0–100.

Formula:

score = 35

if player has an inventory item with id === 'lute':

score += 15

else:

return 0

if state.reputation.eolian_standing >= 40: score += 10

else if state.reputation.eolian_standing >= 30: score += 5

if state.reputation.university_social >= 50: score += 3

if state.fatigue >= 70: score -= 15

else if state.fatigue >= 40: score -= 5

if state.hunger >= 70: score -= 10

else if state.hunger >= 40: score -= 4

if state.warmth < 40: score -= 5

if state.injuries.length > 0: score -= 10

Clamp result 0–100.

This score is engine truth. Do not make it random.

auditionForPipes(
state: PlayerState,

```
db
): { message: string; newState: PlayerState }
```

Rules:

- Player must be at eolian_floor
- canEnterEolian(state) must be true
- Player must have a lute in inventory
- If state.eolian_state.has_talent_pipes is already true:
 - return blocked line
 - state unchanged
- If state.eolian_state.last_audition_day === state.day_number:
 - return blocked line
 - state unchanged

On blocked:

- choose line from EOLIAN_AUDITION_BLOCKED
- state unchanged

On attempt:

- score = calculateAuditionScore(state)

Success threshold:

- if score >= 50:
 - has_talent_pipes = true
 - last_audition_day = state.day_number
 - eolian_standing += 15 (clamp 100)
 - university_social += 2 (clamp 100)
 - fatigue += 5 (clamp 100)
 - hunger += 2 (clamp 100)
 - return success line from EOLIAN_AUDITION_SUCCESS

Failure:

- has_talent_pipes stays false
- last_audition_day = state.day_number
- eolian_standing += 1 (clamp 100)
- fatigue += 4 (clamp 100)
- hunger += 2 (clamp 100)
- return fail line from EOLIAN_AUDITION_FAIL

Do not award money here.

```
playAtEolian(
  state: PlayerState,
  db
): { message: string; newState: PlayerState }
```

Rules:

- Player must be at eolian_floor
- canEnterEolian(state) must be true
- state.eolian_state.has_talent_pipes must be true
- state.eolian_state.performances_today must be 0
- Player must have a lute in inventory

If blocked:

- return a short in-world line
- state unchanged

On success:

- call advanceTime(state, 1)
- then apply:
 - eolian_state.performances_today += 1
 - reputation.eolian_standing += 2 (clamp 100)
 - reputation.university_social += 1 (clamp 100)
 - fatigue += 10 (clamp 100)
 - hunger += 5 (clamp 100)
- return line from EOLIAN_PLAY_LINES

No direct money reward.

The Eolian is not Anker's.

isLutePresent(state: PlayerState): boolean

Return true if inventory contains item id 'lute' with quantity ≥ 1 .

NPC ENGINE — update src/engine/npcEngine.ts

Do not refactor existing working logic.

Only extend it.

Update getNPCProfile() and talkToNPC() to support deoch and stanchion.

Deoch talking rules:

- If topic is null: socially smooth greeting
- If topic is 'music' or 'players': answer with cultured practicality
- If topic is 'imre': answer lightly, as someone rooted there
- If topic is 'pipes': acknowledge they must be earned
- If topic is taboo: polite deflection

Stanchion talking rules:

- If topic is null: brief, busy greeting
- If topic is 'pipes' or 'auditions': explain that standards matter
- If topic is 'rules': practical answer about how the place runs
- If topic is taboo: brisk refusal

Do not make either one sound modern, theatrical, or over-friendly.

If `parseNPCCommand()` already supports:

talk to deoch

talk to stanchion

ask stanchion about pipes

ask deoch about music

then leave the parser alone.

Only extend it if necessary.

MOVEMENT — update `src/engine/movement.ts`

Extend both `getAccessibleExits()` and `movePlayer()` to support this new `access_condition`:

'open_evening'

- accessible only when `state.time_of_day` is 'evening' or 'night'

Rules:

- `getAccessibleExits()` should exclude `open_evening` exits when it is morning or afternoon
- `movePlayer()` must still distinguish:
 - (a) no exit exists
 - (b) exit exists but is blocked
- For blocked `open_evening` exit:
 - return message from `EOLIAN_NOT_OPEN_LINES` using deterministic `index = state.day_number % 3`

Do not add any other new movement access conditions in this prompt.

ACTIONS — update `src/engine/actions.ts`

Add these commands to `dispatch()`:

audition for pipes

- > call `auditionForPipes(state, db)`
- > return only the result line and `newState`
- > do not auto-render location afterward

play at eolian

- > call playAtEolian(state, db)
- > return only the result line and newState
- > do not auto-render location afterward

Keep all existing commands from Prompts 1–4 intact.

After any successful audition or performance:

- if tuition is not yet paid, call checkTuitionDeadline() as per Prompt 2

Do not add any other new commands in this prompt.

TIME / DAILY RESET — update src/engine/time.ts and economy.ts

Prompt 2, 3, and 4 already modified advanceTime() and sleep().
Keep those changes. Add only the following:

In advanceTime():

- When the time cycle passes from night -> morning,
reset:
eolian_state.performances_today = 0

Do not reset last_audition_day.

Do not change any other recovery logic.

In economy.ts sleep():

- After a successful sleep, also reset:
eolian_state.performances_today = 0

Do not change any other economy behaviour.

LOCATION FLAVOUR — update src/content/locationFlavour.ts

Add entries for all 5 new locations.

Rules:

- Exactly 4 lines per location
 - Original prose only
 - Grounded, sensory, restrained
 - Imre should feel distinct from the University:
brighter, more public, more polished, but still real
 - The Eolian should feel charged, attentive, and socially exposed
-
-

Import:

```
canEnterEolian,  
calculateAuditionScore,  
auditionForPipes,  
playAtEolian,  
isLutePresent  
from src/engine/musicEngine.ts
```

Also import:

```
initDefaultPlayerState from src/engine/state.ts  
runMigrations from src/db/schema.ts  
runSeed from src/db/seed.ts  
movePlayer from src/engine/movement.ts  
Database from better-sqlite3
```

Use an in-memory SQLite DB:

```
new Database(':memory:')
```

Call runMigrations() and runSeed() before tests.

Tests:

isLutePresent:

1. default player state returns true
2. state with lute removed returns false

canEnterEolian:

3. evening returns true
4. morning returns false

calculateAuditionScore:

5. healthy default state with lute returns a score > 0
6. exhausted and hungry state returns a lower score than healthy state

auditionForPipes:

7. wrong location returns blocked and unchanged state
8. eolian_floor in evening with healthy state and lute can succeed or fail deterministically, but must set last_audition_day to current day
9. second audition attempt on the same day returns blocked
10. successful audition sets has_talent_pipes true

playAtEolian:

11. without talent pipes returns blocked and unchanged state
12. with talent pipes at eolian_floor in evening advances time by 1 and increments performances_today
13. second performance on same day returns blocked

movement:

14. attempting enter from eolian_exterior in afternoon returns blocked line, not "You cannot go that way."
15. attempting enter from eolian_exterior in evening succeeds

Add 2 tests to existing tests/npcEngine.test.ts:

10. talkToNPC('deoch', 'music', stateAtEolian, db)
returns non-empty string
11. talkToNPC('stanchion', 'pipes', stateAtEolian, db)
returns non-empty string

ARCHITECTURE REMINDERS

These rules from Prompt 1 still apply:

- narration/* never reads from or writes to the DB
- narration/* never mutates PlayerState
- engine/* owns all state changes
- repl.ts saves state exactly once per turn
- No `any` types
- No external API calls
- No unused imports or files

musicEngine.ts is an engine-layer file.

It may read from the DB.

It must not call narrator methods directly.

SUCCESS CRITERIA

This prompt is complete when:

- the player can walk from the University side to Stonebridge, then to Imre, then to the Eolian
- attempting to enter the Eolian in the daytime returns an in-world "not open" line
- entering in the evening works
- `talk to deoch` returns a voice-true social line
- `talk to stanchion` returns a voice-true practical line
- `ask stanchion about pipes` explains that they are earned
- `audition for pipes` works only inside the Eolian
- a successful audition grants talent pipes and boosts Eolian standing
- a failed audition still consumes the day's attempt

- `play at eolian` works only if the player has pipes
- Eolian performance gives prestige, not direct coin
- performances_today resets on the next morning
- all new tests pass alongside earlier prompts' tests
- no network calls occur at any point
- no refactoring of working Prompt 1–4 code

=====
END OF PROMPT 5
=====
